

New GBAC STAR™ Facility Directory Helps Locate Facilities Accredited for Cleaning Excellence

NORTHBROOK, Ill.—Oct. 9, 2020—The Global Biorisk Advisory Council® (GBAC), a Division of ISSA, today launched its [GBAC STAR™ Facility Directory](#). This new web-based tool allows users to identify facilities that have earned or committed to achieve GBAC STAR accreditation, the designation reserved for facilities that have demonstrated a thorough approach to cleaning, disinfection, and infection prevention.

“We’re excited to unveil this new tool to help the public discover which facilities are taking important steps forward with their approach to cleaning,” said GBAC Executive Director Patricia Olinger. “The GBAC STAR program has more than 250 facilities accredited and 3,000-plus committed to accreditation in more than 80 countries, with additional facilities added daily. This results in an impressive directory that is easily searchable and always accessible.”

The GBAC STAR Facility Directory is a searchable listing of facilities around the world, including stadiums and arenas, convention centers, hotels, restaurants, airports, commercial facilities, and more. Users can search the directory by facility name, facility type, location (region, state/province, country, or zip/postal code), or keyword. Each resulting pin provides the property’s name, address, website, facility type, and accreditation status.

GBAC STAR accredited facilities have completed a rigorous screening process to ensure they are truly committed to championing cleanliness; have established goals and risk mitigation strategies; implemented effective tools, equipment and supplies; and prioritized training, prevention, and preparation.

“GBAC STAR accreditation indicates that behind the scenes, facilities are properly conducting cleaning and disinfection to keep employees and visitors safe,” said ISSA Executive Director John Barrett. “This new directory is a visual resource that instills confidence in consumers as they aim to normalize their daily lives during this pandemic and into the future.”

To apply for GBAC STAR facility accreditation or for more information, visit gbac.org/star.

About GBAC, a Division of ISSA

Composed of international leaders in the field of microbial-pathogenic threat analysis, mitigation, response and recovery, the Global Biorisk Advisory Council (GBAC), a Division of ISSA, provides training, guidance, accreditation, certification, crisis management assistance and leadership to government, commercial and private entities looking to mitigate, quickly address and/or recover from biological threats and real-time crises.
